

IRAN DEAL NEVER EXPIRES

Permanent Restrictions Prevent a Nuclear-Armed Iran

FOREVER

Never seek, develop or acquire nuclear weapons

Prohibited weaponization activities

Enhanced Additional Protocol: inspection of any site within 24 days

Pre-notification on nuclear facility construction

Redesigned Arak reactor: no weapons-grade plutonium; irradiated fuel out of country

TO 2041

IAEA monitoring of all uranium mines and mills

TO 2036

International monitoring of the production, assembly and storage of machines used to enrich uranium

TO 2031

No more than 300kg uranium, must be very low enriched (3.67%)

Limited heavy water inventory

Cannot separate plutonium or have any facilities capable of such work

No uranium or plutonium metals acquisition or R&D on metals; no facilities for converting fuel plates or scrap back to UF₆

No more heavy water reactors and reliance only on light water for future power and research reactors

One site for uranium enrichment and enrichment R&D (Natanz) with daily inspections

No enrichment or related R&D or nuclear material at Fordow, with daily inspections

Hot cells only at approved sites

TO 2026

Only 5,060 operating IR-1 (first generation) centrifuges, down from nearly 20,000 in 2014

Severely reduced R&D on more advanced centrifuges
