IRAN DEAL NEVER EXPIRES

Permanent Restrictions Prevent a Nuclear-Armed Iran

**FOREVER**
- Never seek, develop or acquire nuclear weapons
- Prohibited weaponization activities
- Enhanced Additional Protocol: inspection of any site within 24 days
- Pre-notification on nuclear facility construction
- Redesigned Arak reactor: no weapons-grade plutonium; irradiated fuel out of country

**TO 2041**
- IAEA monitoring of all uranium mines and mills

**TO 2036**
- International monitoring of the production, assembly and storage of machines used to enrich uranium

**TO 2031**
- No more than 300kg uranium, must be very low enriched (3.67%)
  - Limited heavy water inventory
  - One site for uranium enrichment and enrichment R&D (Natanz) with daily inspections
  - Cannot separate plutonium or have any facilities capable of such work
  - No enrichment or related R&D or nuclear material at Fordow, with daily inspections
  - No uranium or plutonium metals acquisition or R&D on metals; no facilities for converting fuel plates or scrap back to UF6
  - Hot cells only at approved sites

**TO 2026**
- No more heavy water reactors and reliance only on light water for future power and research reactors
- Only 5,060 operating IR-1 (first generation) centrifuges, down from nearly 20,000 in 2014
- Severely reduced R&D on more advanced centrifuges
